GROWNEST GREENHOUSES

WHO WE ARE & WHAT WE DO

It started with frustration watching food prices rise, produce travel thousands of miles, and fresh, local options become harder to find. We wanted a better way to grow.

So, we built our first greenhouse not just to grow plants, but to grow independence. What began as a backyard experiment turned into GrowNest, a mission to help others take control of their food, their health, and their connection to nature.

Today, our greenhouses empower families, gardeners, and dreamers to grow fresh food year-round sustainably, simply, and beautifully.

NON-GROWING GROWERS

SOMETIMES THE MOST PRODUCTIVE THING
YOU CAN DO IS RELAX

Our versatile A-frame greenhouses aren't just for plants — they're perfect for creating a beautiful garden lounge or entertainment space.

Enjoy tea, host friends, or relax under the soft natural light, surrounded by your garden's beauty.

Perfect for gardens, patios, or lifestyle settings durable, elegant, and designed for year-round comfort.

NON-GROWING GROWERS

Our non-growing greenhouses have glass side panels, 4mm UV-protected polycarbonate roofs that are rust-resistant, and aluminum frames.

These products also come with a 3 year built to last warranty and an easy to follow Instruction Manual.

Each structure can be tailored to your space and vision.
